

**For the year ended 31 March 2023.**

This update was first made publicly available on 30 June 2023.

## What is the purpose of this update?

This document tells you how the Long Term Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. New Zealand Post Trustees Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

## Description of this fund

The fund invests predominantly in growth assets (e.g. equities) with only a small percentage in income assets (e.g. bonds). Its objective is to achieve returns of 3% above inflation over a 5-year period while keeping the probability of a negative return over a 12-month period (calculated each quarter) at 1 year in 4.

Total value of the fund	\$15,240,759
Number of investors in the fund	192
Date the fund started	1 April 2014

## What are the risks of investing?

### Risk indicator for the Long Term Fund

< Lower risk  
Potentially lower returns

Higher risk >  
Potentially higher returns

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz/tools/investor-kickstarter](http://www.sorted.org.nz/tools/investor-kickstarter).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the statement of investment policy and objectives available at [www.superplan.co.nz](http://www.superplan.co.nz) and on the register at [www.disclose-register.companiesoffice.govt.nz](http://www.disclose-register.companiesoffice.govt.nz) for more information about the risks associated with investing in this fund.

## How has the fund performed?

	Average over past 5 years	Past year
Annual return (after deductions for charges and tax at 28%)	4.83%	-0.87%
Annual return (after deductions for charges but before tax)	4.87%	-0.81%
Market index annual return (reflects no deduction for charges and tax)	7.50%	-1.00%

The market index annual return is based on the returns of a composite index. The composite index is made up of the individual asset class benchmark indices used to measure the performance of each underlying fund/asset class into which the fund invests. Accordingly, the market index annual return for each of the funds is a composite return, calculated using the weighted average return of the benchmark indices used to measure the performance of the underlying funds/assets into which each fund invests. The weighting for each benchmark within the composite is equal to the strategic asset allocation weighting for that asset class. This market index return provides a relative measure of the fund's performance.

Further information about the market index is available on the offer register at [www.disclose-register.companiesoffice.govt.nz](http://www.disclose-register.companiesoffice.govt.nz).

### Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started up to 31 March 2023.

**Important: This does not tell you how the fund will perform in the future.**

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

## What fees are investors charged?

Investors in the Long Term Fund are charged fund charges. In the year to 31 March 2023, these were:

	% of net asset value
<b>Total fund charges</b>	0.81%
Which are made up of:	
<b>Total management and administration charges</b>	0.81%
Including:	
Manager's basic fee	0%
Other management and administration charges	0.81%
<b>Total performance-based fees</b>	0%
<b>Dollar amount per investor or description of how charge is calculated</b>	
<b>Other charges</b>	N/A

Small differences in fees and charges can have a big impact on your investment over the long term.

## Example of how this applies to an investor

Mary had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Mary incurred a loss **after fund charges** were deducted of \$81 (that is -0.81% of her initial \$10,000). Mary also paid \$0 in other charges. This gives Mary a total loss **after tax** of \$87 for the year.

This example is based on a hypothetical investor paying tax at the highest prescribed investor rate that applied throughout the period.

## What does the fund invest in?

This shows the types of assets that the fund invests in.

## Top 10 investments

	Asset name	% of fund assets	Type	Country	Credit rating
1	Vanguard TOT World Index Stk I	36.49%	International equities	USA	N/A
2	NZGS 05/32	8.30%	New Zealand fixed interest	NZ	AA+
3	Morgan Stanley – NZD a/c	7.41%	Cash and cash equivalents	NZ	A+
4	iShares 7–10 yr bond ETF	5.96%	International fixed interest	USA	AAA
